Preliminary Enquiry Form

21. Please specify what dog you would consider – include age / colour / sex / size. Please consider that dogs which come into rescue often come with 'issues' which could include sight, toilet training, ear/skin/teeth issues or any other age related / poodle specific illness, separation anxiety & behavioural problems. It may be necessary to attend training/behavioural classes for assistance with these issues. We are looking for caring, committed pet homes for these dogs and people who are willing to work with them and their issues. We ask that you take this into account when completing this form. If there are issues you cannot cope with, please list these.

Dog Age:

Dog Sex: Male / Female / Either

Dog Size: Toy / Miniature / Standard

Other information:

22. Please give details of any other dogs & animals, including breed, age, sex already in your household or any that visit regularly.

By submitting this form to us you are confirming that you agree with and will consider the following information: Our dogs are rescues and many come with issues and medical conditions. Part of rescuing any animal is working with it to restore it to the best health and condition and to ensure it becomes a valued, well rounded & socialised animal; by becoming a carer for a rescue dog you are agreeing to work with the dog to ensure this. A dog can take months to fully settle and learn your routines, we do not know what has happened to the dog before it comes into us and they cannot tell us. You must allow the dog time to adjust and settle; adopting a rescue is not a fast track to a fully housetrained, well socialised and well trained dog. Our dogs will often require training and we expect you to take them to training classes at your cost if needed.

Many rescues come with separation anxiety, this is an issue which takes patience and time to overcome and as it is often caused by change and loss of what they are used to; this is something which may only present itself when the dog is in your home and you must be prepared to deal with this, it can include barking, howling, chewing & soiling when left to name a few of the symptoms, please research this. Where possible we give you the information on the dogs background with children, however children's interactions with dogs should be supervised at all times and we are not responsible for how a dog interacts with children.

We are always here to provide support and advice should you need it on any issues for the life of the dog, please contact us as soon as you can so we can help, do not leave it as this can make issues worse.

We do not receive Pedigree & health testing information with our dogs therefore we cannot guarantee our dogs are 100% Poodle. We often do not receive vaccination information or medical records with the dogs and we can only use

information provided by the previous owners; we are not responsible for incorrect information from previous owners. We do not routinely vaccinate after puppy vaccinations & we promote titre testing. If you choose to vaccinate or test, this is at your cost.

Poodles are prone to ear infections and teeth problems which may need treatment by you, particularly when a dog has come to you straight from the previous owner, please advise us of this asap. We are not responsible for long-term illnesses a dog develops once it is in your care and do recommend you take out adequate insurance for veterinary costs. You can opt to take 5 weeks free insurance from us starting when the signed contract is received by us; you are not obliged to continue this, but should you choose to do so we are paid a commission by Agria. Under NO circumstances do we allow our dogs to be used for breeding, they are routinely spayed & neutered.

If, for any reason, you are no longer able to care for the Poodle(s) you or your next of kin are legally bound to return the dog(s) to Poodle Network UK. You must keep your contact details which we have for you up to date.

All Carers/owners must abide by all relevant UK Laws and local byelaws regarding ownership of dogs, including the liability for any damage or injury to third parties or their property by the Poodle(s). In particular, liability may arise in negligence under Section 8 of the Animals Act 1971 and in the case of dogs, Section 3 of the Act imposes a general liability to the keeper of a dog for causing death or injury to livestock. The possibility of an action for nuisance should also be recognised. PNUK strongly advises all Carers/owners to arrange appropriate liability insurance cover. It is your responsibility to ensure a dog wears suitable identification with your contact details on when out in public and that you keep your details on the microchip up to date.

The information on this form is used to contact you about your application. We will keep your details on record for the life span of any dog you receive from Poodle Network UK and we may use this information to contact you about the dog during its lifetime. We may contact you for marketing and information purposes unless we have been told not to. We only disclose your information to the microchip companies and the insurance company should you confirm you want insurance with any dog you receive from us or if we are obliged to do so by law. We do not disclose or sell any information to marketing companies. Our full GDPR policy is available on request.

A none returnable Donation determined by the age and condition of the dog is payable to the general costs of running the Charity: veterinary costs, food for foster dogs, transport of dogs. Donations are paid into the PNUK fund to cover the sometimes high costs of those dogs that require Veterinary treatment, grooming, training etc., and for the everyday occurring costs of providing a country wide Rescue and Rehoming Service for poodles in need. Every person involved in PNUK are unpaid volunteers. If the dog has a lifetime condition requiring medication on leaving us we may pay towards medication costs, the fees for such Poodles will be agreed with you.
